

A look at reddit mentions
and stock prices

Data
distributed
on
subreddits

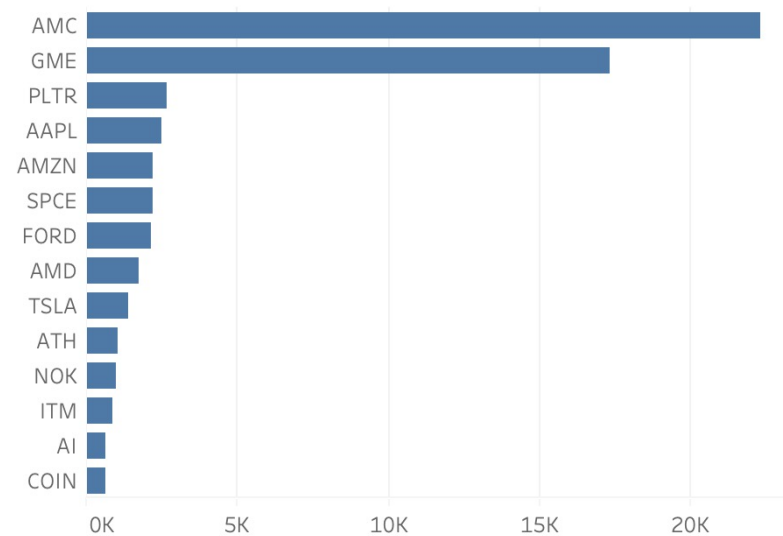

- wallstreetbets is by far our largest source of data.

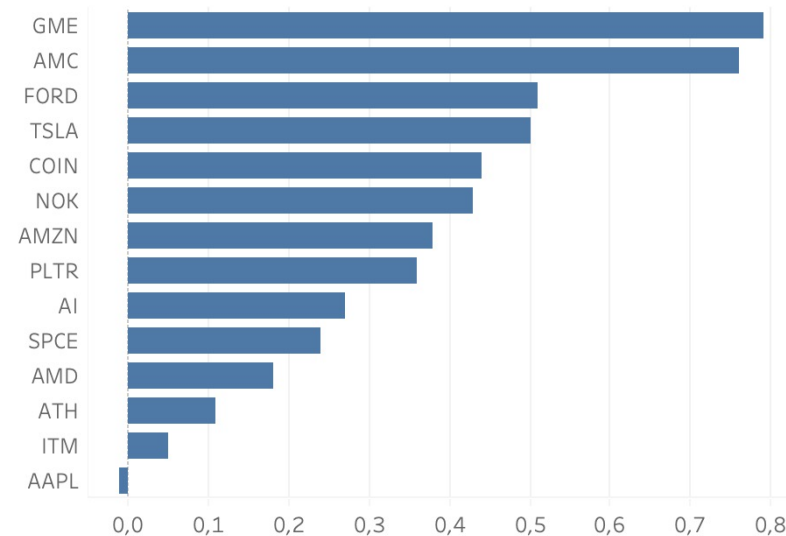

- algotrading, pennystocks and Robinhood contain too little data to be useful. And will be removed for further analysing.

AMC and GME are top two in both charts	GME Correlation coefficient: 0.79	AMC Correlation coefficient: 0.76	FORD Correlation coefficient: 0.51	AAPL Correlation coefficient: -0.01	
--	--------------------------------------	--------------------------------------	---------------------------------------	--	--

Mentions

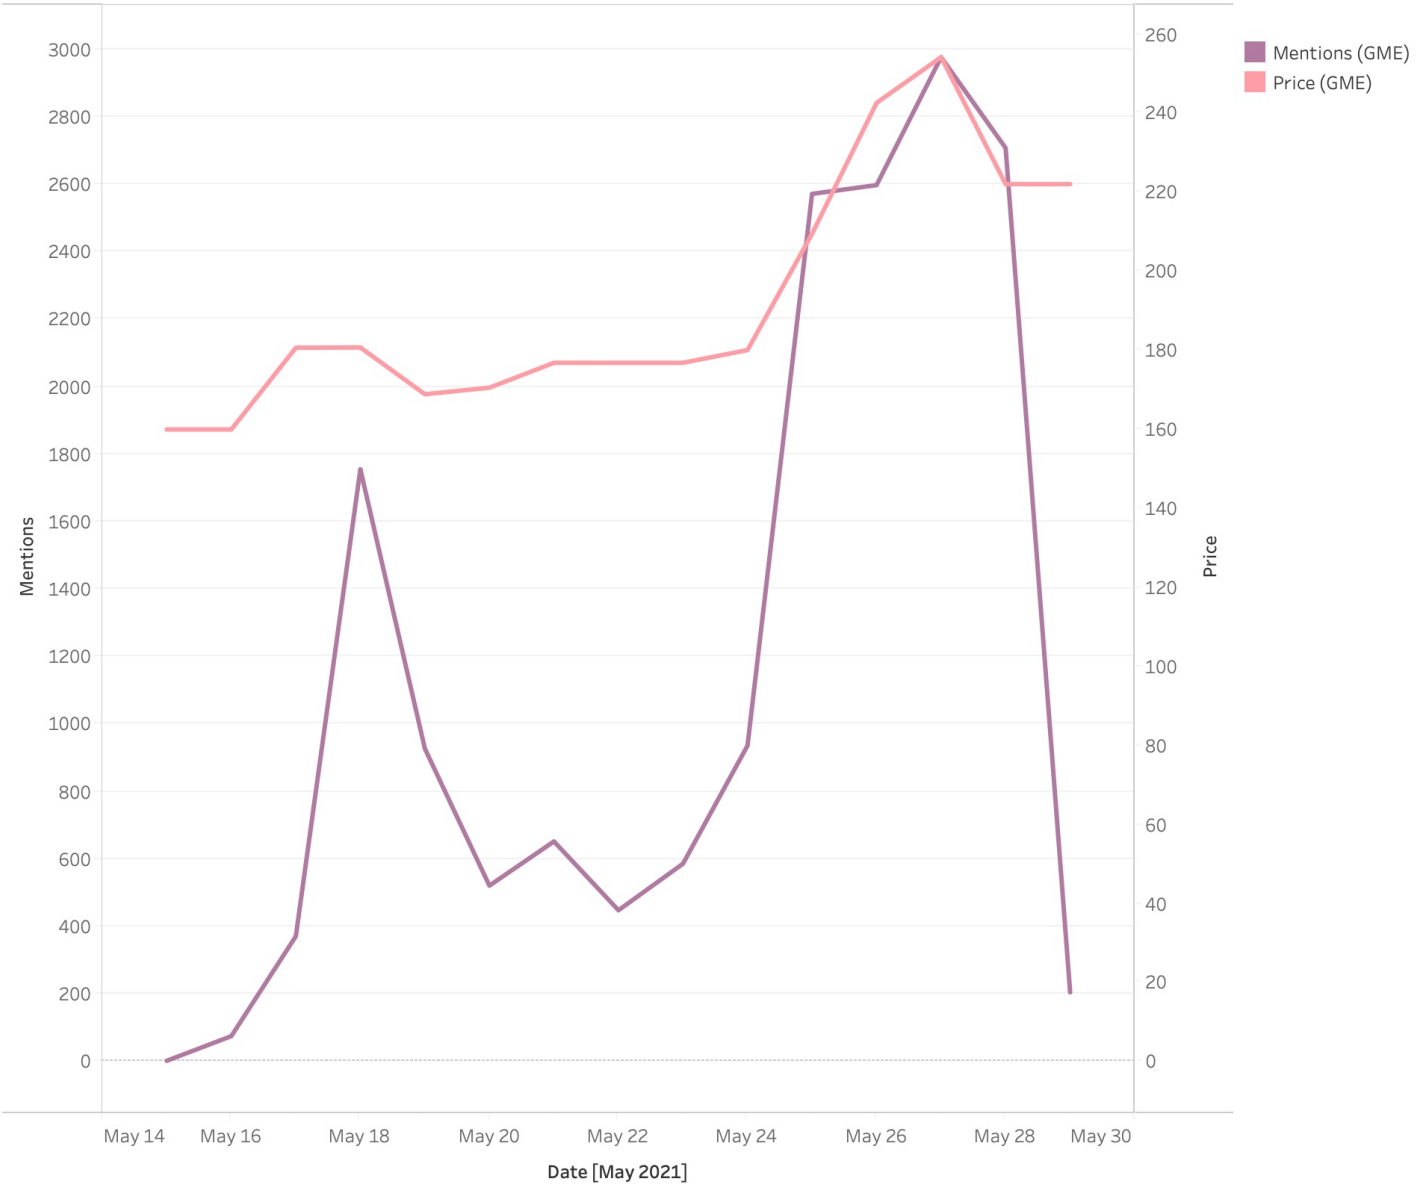

Correlation Coefficient

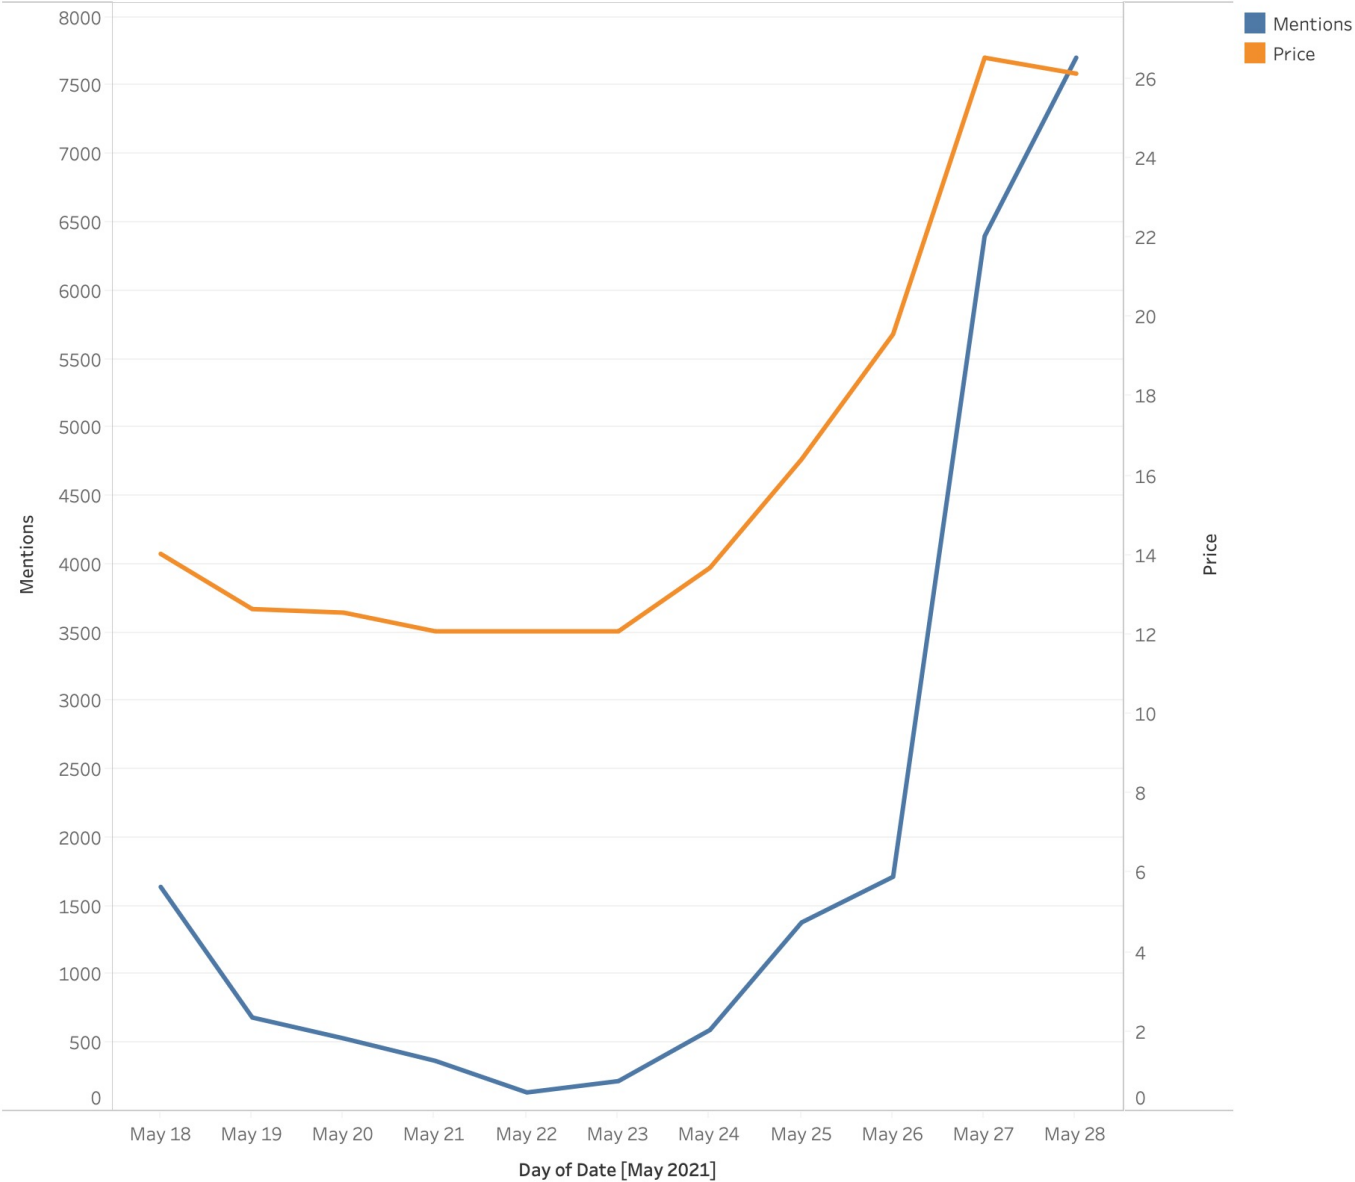

AMC and GME are topping both the mentions and the correlation coefficient.

Lets take at look at them i comparison to the correlating stock prices. We will take a look at one from the middle (FORD) and one from the bottom ((AAPL) of correlation coefficient as well.
